The new warranty policy offered by the vendor for units sold outside the USA would only allow returns of units that are dead-on-arrival within 90 days of purchase. The vendor will no longer offer extended warranty programs with the sale of new units.

Advanced Records Management continues to be the Asia Pacific distributor for the ePad range, but we do NOT have any repair services. The new vendor does not offer repair services for out-of-warranty products sold outside the United States.

Warranty claims and requests for RMA (Return Maintenance Authority) should be made directly to the manufacturer for warranty replacement within 90 days of purchase. After warranty expiry no repair service is available. ePadLink's full address is available from A.R.M.
